

## Voice Training - Advanced Course

### **Aim**

This course picks up from where the Introductory Course left off, with an intensive one-on-one analysis of current vocal technique for the spoken word in broadcasting, in order to improve it still further.

### **Who For?**

Anyone who has previously attended the 3 hour Introductory Course, as part of a group.

### **Duration**

1 hour

### **Outline**

As the group environment of the Introductory Course leaves little time for one-on-one training, this course makes the most of the time available by getting each candidate to read as many scripts as possible out loud. Each one is recorded and played back, and an analysis carried out to demonstrate how the reading of them could be improved. Scripts are provided, or the candidate can bring their own along to the session if they prefer.

Again, typical subject matter covered includes stress, emphasis, pace, pitch, inflection, volume, articulation and fluency, as well as how to convey mood, energy, enthusiasm etc.

### **Trainer**
